

## Case of the Month Listing:

### 2018 Cases:

- Jan. 2018 - Pacemaker lead inadvertently placed in the LV
- Feb. 2018 - Giant Myxoma: It grew faster than you would think!
- Mar. 2018 - Rapid deterioration of bioprosthetic MVR
- Apr. 2018 - Flail A1 segment due to lateral wall infarction
- May 2018 - Intramural hematoma of the ascending aorta
- Jun. 2018 - Aortic sinus of Valsalva rupture
- Jul. 2018 - Carcinoid tumor in the RV outflow tract mimicking clot
- Aug. 2018 - Giant coronary artery aneurysm
- Sep. 2018 - Congenital absence of pericardium: 'Snoopy dog heart'
- Oct. 2018 - Transcatheter valve-in-valve for failed surgical bioprosthetic MVR
- Nov. 2018 - Super-redundant anomalous mitral chordae in the LV outflow tract mimicking mass
- Dec. 2018 - Ebstein's anomaly before and after TVR

### 2019 Cases:

- Jan. 2019 - The largest LV thrombus you ever saw
- Feb. 2019 - Intra-pericardial Color Doppler flow in Pericardial Effusions: Pericardial Squish Phenomena
- Mar. 2019 - Balloon Valvuloplasty for severe mitral stenosis
- Apr. 2019 - Mitral Clip
- May. 2019 - Lymphoma invading RA with PET scan correlation
- Jun. 2019 - When a large snake thrombus in the RA disappears
- Jul. 2019 - Tiger stripes on Doppler
- Aug. 2019 - High Gradient HIS
- Sep. 2019 - Lung Cancer Mimicking Left Atrial Myxoma
- Oct. 2019 - Lucent LV Apical Thrombus
- Nov. 2019 - Marked Thebesian Venous Flow on Color Doppler
- Dec. 2019 - Rhabdomyosarcoma of the Left Ventricle Causing CVA?
