

Case of the Month Listing:

- Case# 1 - Dec. 2021 - Osteosarcoma obstructing the RV
- Case# 2 - Nov. 2021 - Fulminant Corynebacterium endocarditis: Enormous vegetations with valve destruction
- Case# 3 - Oct. 2021 - Sarcoid cardiomyopathy with LV and RV clots
- Case# 4 - Sep. 2021 - Subaortic membrane with IHSS: A rare combo
- Case# 5 - Aug. 2021 - Tendyne mitral valve replacement
- Case# 6 - Jul. 2021 - Sterile calcific abscess of mitral annulus
- Case# 7 - Jun. 2021 - Post-MI VSD
- Case# 8 - May 2021 - Failed Mitral Clip procedure for severe MR
- Case# 9 - Apr. 2021 - Agitated saline injection during pericardiocentesis
- Case# 10 - Mar. 2021 - Watchman Device
- Case# 11 - Feb. 2021 - Type B dissection: Importance of subcostal view
- Case# 12 - Jan. 2021 - LASH: Lipomatous atrial septal hypertrophy
- Case# 13 - Dec. 2020 - Aortic dissection with large pericardial effusion
- Case# 14 - Nov. 2020 - Pacemaker lead vegetation
- Case# 15 - Oct. 2020 - Bioprosthetic aortic valve endocarditis with pseudo-aneurysm, fistula into LV and infective extension into RA.
- Case# 16 - Sep. 2020 - Repair of post MI VSD
- Case# 17 - Aug. 2020 - Pericardiocentesis that didn't end well
- Case# 18 - Jul. 2020 - Severe Pulmonary Hypertension post MVR
- Case# 19 - Jun. 2020 - Diastolic MR in heart block
- Case# 20 - May 2020 - McConnell's sign in pulmonary embolism
- Case# 21 - Apr. 2020 - Ovarian germ cell tumor in the heart
- Case# 22 - 2020 - Mustard procedure in an adult with heart failure
- Case# 23 - Feb. 2020 - Noncompaction Cardiomyopathy
- Case# 24 - Jan. 2020 - Hypertrophic Cardiomyopathy Yamaguchi Syndrome
- Case# 25 - 2019 - Rhabdomyosarcoma of the Left Ventricle Causing CVA?
- Case# 26 - Nov. 2019 - Marked Thebesian Venous Flow on Color Doppler
- Case# 27 - Oct. 2019 - Lucent LV Apical Thrombus
- Case# 28 - Sep. 2019 - Lung Cancer Mimicking Left Atrial Myxoma
- Case# 29 - Aug. 2019 - High Gradient HIS
- Case# 30 - Jul. 2019 - Tiger stripes on Doppler
- Case# 31 - Jun. 2019 - When a large snake thrombus in the RA disappears
- Case# 32 - May. 2019 - Lymphoma invading RA with PET scan correlation
- Case# 33 - 2019 - Mitral Clip
- Case# 34 - Mar. 2019 - Balloon Valvuloplasty for severe mitral stenosis
- Case# 35 - Feb. 2019 - Intra-pericardial Color Doppler flow in Pericardial Effusions: Pericardial Squish Phenomena
- Case# 36 - Jan. 2019 - The largest LV thrombus you ever saw
- Case# 37 - Dec. 2018 - Ebstein's anomaly before and after TVR
- Case# 38 - Nov. 2018 - Super-redundant anomalous mitral chordae in the LV outflow tract mimicking mass

- Case# 39 - Oct. 2018 - Transcatheter valve-in-valve for failed surgical bioprosthetic MVR
- Case# 40 - Sep. 2018 - Congenital absence of pericardium: 'Snoopy dog heart'
- Case# 41 - Aug. 2018 - Giant coronary artery aneurysm
- Case# 42 - Jul. 2018 - Carcinoid tumor in the RV outflow tract mimicking clot
- Case# 43 - Jun. 2018 - Aortic sinus of Valsalva rupture
- Case# 44 - May 2018 - Intramural hematoma of the ascending aorta
- Case# 45 - Apr. 2018 - Flail A1 segment due to lateral wall infarction
- Case# 46 - Mar. 2018 - Rapid deterioration of bioprosthetic MVR
- Case# 47 - Feb. 2018 - Giant Myxoma: It grew faster than you would think!
- Case# 48 - Jan. 2018 - Pacemaker lead inadvertently placed in the LV
