

## Image Library Case Listing:

1. Giant left atrial myxoma with mitral valve damage
2. Type A aortic dissection
3. Primum ASD
4. Aortic Transection from motor vehicle accident
5. Snake thrombus in right atrium
6. Primary cardiac lymphoma with TEE guided biopsy
7. Libman-Sacks endocarditis
8. 'Sterile' calcific abcess of mitral annulus
9. Idiopathic pulmonary artery aneurysm
10. Ebstein's Anomaly
11. Massive mitral valve vegetation
12. Noncompaction cardiomyopathy, 'Spongy heart'
13. Large atrial septal aneurysm
14. Pulmonary embolism clot in pulmonary artery
15. Hiatal hernia compressing left atrium
16. Atrial septal occlude device
17. Post MI VSD
18. Takasubo cardiomyopathy
19. LVAD and aortic insufficiency
20. Penetrating ulcer of the aorta
21. Tamponade with pericardial strands
22. Thrombotic 'ghost' in the right atrium
23. Q-tip fibroelastoma
24. TPA treatment of large RA clot
25. Pulmonic stenosis during pregnancy
26. Sarcoid LV apical aneurysm
27. Persistent Lt. SVC and sinus venosus ASD

28. 'Kissing' pneumococcal vegetations with rapid destruction of mitral valve in under 3 days
29. Permacath related thrombus
30. Myxoma on a tricuspid valve leaflet
31. Rheumatic tricuspid stenosis and regurgitation
32. Apical pseudoaneurysm with contrast bubble study
33. Constrictive pericarditis
34. Resolution of large apical thrombus with anticoagulation
35. Diastolic MR in a mechanical prosthetic MVR due to strategic AI jet
36. Cardiac compression by massive hematoma following heart transplant
37. Mitral valve aneurysm with rupture
38. A pulsating liver
39. Low gradient aortic stenosis
40. Recognizing ascites on echo
41. Thymoma compressing the heart
42. Atrial 'appendage-ectomy' for atrial fibrillation
43. Intramural hematoma of descending aorta with CT correlation
44. Cardiac melanoma with CT correlation
45. Residual VSD after stab wound to the heart
46. 3D echo of degenerating bioprosthetic AVR
47. Shone's syndrome: Subaortic membrane, mitral stenosis and coartation of the aorta in an adult. Echo with MRI correlation
48. Fabry's cardiomyopathy
49. AVR dehiscence with 'flap valve phenomena' limiting AI
50. Giant sterile 'calcific abscess' of mitral annulus causing severe MR
51. Aortic stent for restenosis of previous surgical coartation repair
52. Pulmonary a-v malformation resulting in CVA: Contrast Echo and CT correlation
53. Quadracuspid aortic valve
54. TIPS stent seen on TTE

55. Dr. Ted Feldman implants a stented AVR in the catheterization lab:  
TEE and angiographic correlation
56. RVAD, (Right ventricular assist device) plus LVAD
57. Spontaneous microbubbles in cirrhosis.
58. When the electricity goes out: LVAD pump failure with a  
continuous axial flow device
59. Large coronary sinus associated with Lt SVC and primary  
pulmonary hypertension: CT correlation
60. Pseudocoarctation of aorta due to large intramural hematoma  
with CT correlation
61. St. Jude AVR malfunction due to pannus formation
62. Corrected transposition associated with severe heart failure in an  
adult
63. Thoracoabdominal aneurysm
64. 3D of Type A aortic dissection
65. Large VSD with Eisenmenger physiology in an adult
66. Suction event with an LVAD
67. Atypical Takotsubo variant: The “inverted” or “reverse” form
68. Benefits of the new Titanium bioprosthetic valve
69. Herceptin cardiotoxicity
70. Left Main Stenosis by Echo
71. McConnell’s sign
72. Anterior infarct expansion followed by ventricular septal rupture
73. Flail tricuspid valve due to pacemaker manipulation
74. Massive posterior aneurysm, pseudo or true?
75. Germ cell carcinoma causing pulmonary artery stenosis and  
pulmonary hypertension reversed with treatment
76. All St. Jude valves are no longer created equally
77. LV myxoma: Guided removal using 3D echo
78. Aorto-right atrial fistula following AVR
79. Interventional repair of mitral valve with clip
80. An unusual color artifact due to LVAD

81. Severe acute AI due to endocarditis
82. Small PDA in adult. Should it be closed?
83. 3D of giant inferior aneurysm
84. A first! 3D echo of clot in transit snared on Chiari network
85. Back to basics: Fluttering of anterior mitral leaflet in AI
86. When not to do a TEE: Esophageal CA
87. Noninfectious dehiscence of mitral ring repair
88. SVC stent: Weird findings in RA
89. When the descending aorta gets screwed! An orthopedic appliance invades aortic wall
90. Pericardial effusion in the transverse sinus and unusual appearance of left atrial appendage
91. Mobile outflow tract mass: 'CAT' Calcified amorphous tumor
92. Now you see it now you don't: The case of the missing fibroelastoma
93. Ruptured sinus of Valsalva aneurysm into Right Atrium
94. A 3D bouncing free floating ball thrombus and a large 'pre-detachment' wall thrombus with mitral stenosis
95. Compression of the left atrium: Hiatal hernia vs. cancer
96. Low gradient AS and the value of a post PVC beat
97. RV Takotsubo: It's more frequent than you think
98. Aortic valve abscess with extension into fibrous mitral trigone
99. Unusual cause of mitral regurgitation immediately post MV repair
100. Primary cardiac lymphoma encasing and invading the heart with MRI and CT correlation
101. Two cases of endothelial cell cysts in the heart
102. Bioprosthetic aortic valve with flail leaflet and eccentric AI masking severity
103. Giant post-operative thoracic seroma compressing the heart
104. 'Gas burner' aorta following Type1 dissection repair
105. Extra-cardiac pathology in the liver

106. Rapid development of massive LV thrombus in HIT syndrome
107. Pericardial cyst
108. Aortic dissection associated with pregnancy
109. Amplatzer device endocarditis following ASD closure
