

## Echo Pearls Listing

1. Massive LV thrombus in HIT syndrome
2. Pericardial cyst
3. Aortic dissection associated with pregnancy
4. Amplatzer device endocarditis following ASD closure
5. Large Chiari network mimicking mass
6. Midcavity HCM and TID on nuclear stress
7. Traumatic avulsion of the tricuspid valve
8. Diastolic MR
9. LV to RA fistula: Gerbode defect
10. Subaortic membrane
11. Giant RV in pulmonary HBP with severe TR
12. Bifid LA appendage confused as mass
13. Slit like Left Atrium
14. Bioprosthetic TVR failure
15. Mitral clip with suboptimal result
16. Light chain amyloid heart
17. Tamponade with pericardial drainage and bloody fluid
18. Tenedyne MVR
  
19. Clot in transit caught on pacemaker lead
20. Atrial flutter features on TTE
21. Sarcoma infiltrating the RA with MRI correlation
22. Watchman device with and without leak including 3D
23. Amyloid heart with 'cherry on sundae' speckle strain Doppler
24. Set of metal teeth in the heart: Cor-Knot technology
25. Mediastinal tumor compressing the RV outflow
26. Stress heart syndrome before and after recovery
27. Mechanical AVR dehiscence: Toilet seat phenomena
28. Clot in LAA during NSR (Normal Sinus Rhythm)
29. LVAD patient without mitral or tricuspid valves
30. Mitral valve remnants
31. Papillary muscle rupture
32. Giant Lambl's excrescence twins

33. Large PFO causing CVA
34. Tamponade with electrical alternans on ECG
35. Leiomyosarcoma of the uterus in the heart with CT scan correlation
36. Impella device in the LV chamber
