

Echo Pearls Listing

1. Clot in transit caught on pacemaker lead
2. Atrial flutter features on TTE
3. Sarcoma infiltrating the RA with MRI correlation
4. Watchman device with and without leak including 3D
5. Amyloid heart with 'cherry on sundae' speckle strain Doppler
6. Set of metal teeth in the heart: Cor-Knot technology
7. Mediastinal tumor compressing the RV outflow
8. Stress heart syndrome before and after recovery
9. Mechanical AVR dehiscence: Toilet seat phenomena
10. Clot in LAA during NSR (Normal Sinus Rhythm)
11. LVAD patient without mitral or tricuspid valves
12. Mitral valve remnants
13. Papillary muscle rupture
14. Giant Lambl's excrescence twins
15. Large PFO causing CVA
16. Tamponade with electrical alternans on ECG
17. Leiomyosarcoma of the uterus in the heart with CT scan correlation
18. Impella device in the LV chamber
